DETAILED ACTION

1. This application has been reviewed. Original claims 1-33 are pending. The rejection cited stated below.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Page 2

Application/Control Number: 10/644,692 Page 3

Art Unit: 2157

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-33 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-33 of U.S. Patent No. 7, 102,996 Although the conflicting claims are not identical, they are not patentably distinct from each other because other than minor obvious variations the claims of this instant application are not patentable distinct from the patented claims 1-33.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 31-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Ditta et al., U.S. Patent Application Publication No. 2 005/0008017[hereinafter Ditta].

 As per claim 31, Ditta discloses an apparatus for routing a packet over a network, comprising:

Art Unit: 2157

(a) a transceiver that receives and forwards each packet (602) (see fig. 7 and paragraph 0059); and

(b) coupled to the transceiver (704), a means for routing each received packet to a corresponding traffic manager, wherein the routing means determines the corresponding traffic manager based in part on either source information or destination information in each received packet depending upon a comparison of the source information with the destination information, wherein a response packet to each received packet is forwarded to the same corresponding traffic manager (706) (see fig. 6 and paragraph 0060, 0062).

As per claim 32, Ditta discloses apparatus of claim 31, wherein source information further comprises a source IP address and a source port number in the received packet, and wherein destination information further comprises a destination IP address and a destination port number in the received packet (see paragraph 0036).

- 4. Claims 33 is rejected under 35 U.S.C. 102(e) as being anticipated by Graham-Cumming, Jr., U.S. Patent No. 6,182,146[hereinafter Graham-Cumming].

 As per claim 33, Graham-Cumming discloses a method for routing packets between a first device and a second device on a network, comprising:
- (a) receiving a packet) (see fig. 3 and col. 5, line 5 to col. 6, line 21); and
- (b) extracting a source port and a destination port of the first device from the received packet (see col. 5, lines 59-65);

Application/Control Number: 10/644,692

Art Unit: 2157

(c) determining a traffic manager corresponding to a combination of the first device and

the second device, based in part on a comparison of the extracted source port and

extracted destination port of the first device; and

(d) forwarding (passing) the received packet to the determined traffic manager

(application handler) (see fig. 3 and col. 5, line 5 to col. 6, line 21).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Salad E. Abdullahi whose telephone number is 571-272-4009. The examiner can normally be reached on 8:30 - 5:00. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on 571-272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
